SISMA SMARK 500 YAG MARKING LASER

The Smark-500 laser system better represents the compromise between a high power source, compact dimensions and flexibility of many accessories. Ideal for marking small to medium parts, inside and outside of rings, images or text. Very small dimensions of the spot (or laser marking point) allows quick marking operations with a very high quality result. The versatility of the Smark laser also allows you to create precise and intricate cutouts for high speed productivity.
